1. Recipe Finder App

Live: <https://unrivaed-liger-f133a0.netlify.app/>

Developed a **Recipe Finder App** using HTML, CSS, JavaScript, and Recipe API. This Project was an incredible learning experience that allowed me to enhance my web development skills.

Key Features:

- **Automatic login Popup:** A user-friendly login experience that pops up as soon as the app loads
- **Dynamic Recipe Search Functionality:** Users can easily search for their favorite recipe and explore a variety of culinary delights.
- **API Integration:** Utilized a recipe API to fetch and display data dynamically.

2. Bark & Buy – Dog Breed E-commerce App

Tech Stack: React.js, Vite, CSS, Dog API, Netlify

Bark & Buy is a interactive pet e-commerce web application built using React.js and Vite. The platform allows users to browse different dog breeds, view breed-specific information, add pets to a shopping cart, mark favorites, and contact the site owner. The app integrates external data via the Dog API and uses localStorage for persistent user preferences.

Key Features:

- **Dog Breed Explorer:** Dynamic listing of dog breeds with images and descriptions fetched from the Dog API.
- **Favorites System:** Allows users to add/remove favorite breeds, stored persistently via localStorage.
- **Shopping Cart:** Add to cart functionality with item quantity updates and cart summary.
- **Breed Details Page:** View detailed information about each dog breed with smooth navigation.
- **Contact Page:** Functional contact form to reach out for inquiries.
- **Custom Styling & Animations:** Light-themed design with animated UI components for a modern look. - **Deployment:** Hosted live on Netlify with optimized performance and fast load times.
